March 2011

Dear Nurse Educator,

Are your spiritual care assessment tools and protocols as complete as they can and should be? Is it your desire to be in 'spiritual assessment' compliance with JCAHO and/or CHAP regulatory guidelines? Is your goal for all of your patients/residents to have a peaceful end-of-life journey/quality death experience? Have you offered your employees education in ELNEC or end-of-life training?

I am offering you a way to increase education to your staff and increase compliance without hiring full-time employee(s) to provide this service. My services are specifically designed for hospice, hospital and long-term care facilities in accomplishing these goals. Education is available in a complete Peaceful Journey End-of-Life program, or can be broken down into as many pieces or topics that you wish for your staff.

On the home page of my website you can download my brochure outlining the end-of-life services. This document and my website outline my qualifications and experience in end-of-life expertise.

I would greatly appreciate the opportunity to discuss services that will enhance your compliance and patient care in providing a quality dying/death experience for your patients/residents/clients. My goal is assisting organizations to alleviate the angst that comes with regulatory noncompliance.

Please do not hesitate to contact me at the above address, phone number or email address. I will follow-up with you in the near future to discuss how I may be of assistance in meeting your education needs.

Sincerely,

Reinette P. Murray, MSN, RN
Consultant, End-of-Life Care
